

Pebbles Fagan, Ph.D., M.P.H., is a professor and the director of the Center for the Study of Tobacco at the University of Arkansas for Medical Sciences, Fay. W. Boozman College of Public Health, Department of Health Behavior and Health Education. She formerly served as program director for the Cancer Prevention and Control Program at the University of Hawaii Cancer Center and served as a health scientist in the Tobacco Control Research Branch at the National Cancer Institute. Dr. Fagan has more than 20 years of experience in conducting research that aims to increase knowledge on how to reduce tobacco- and cancer-related health disparities in racial/ethnic, socially disadvantaged and marginalized communities. She has a long-standing track record of using team-based science to examine social, behavioral and biobehavioral factors associated with health disparities.
